</tbody>
</table>

(Circle the bullets that are documented.)

NOTE: For the descriptions of the elements of examination containing the words "and", "and/or", only one (1) of those elements must be documented.

System/Body Area | Element of Examination
---|---
Neck | • Examination of neck (e.g., masses, overall appearance, symmetry, tracheal position, crepitus) • Examination of thyroid (e.g., enlargement, tenderness, mass)
Respiratory | • Assessment of respiratory effort (e.g., intercostal retractions, use of accessory muscles, diaphragmatic movement) • Auscultation of lungs (e.g., breath sounds, adventitious sounds, rubs)
Cardiovascular | • Auscultation of heart with notation of abnormal sounds and murmurs • Examination of peripheral vascular system by observation (e.g., swelling, varicosities) and palpation (e.g., pulses, temperature, edema, tenderness)
Lymphatic | • Palpation of lymph nodes in neck, axillae, groin, and/or other location
Skin | • Inspection and/or palpation of skin and subcutaneous tissue (e.g., rashes, lesions, ulcers)
Neurological/Psychiatric | Brief assessment of mental status including: • Orientation (e.g., time, place and person) and • Mood and affect (e.g., depression, anxiety, agitation)

System/Body Area | Elements of Examination
---|---
Constitutional | • Measurement of any three of the following seven vital signs: 1) sitting or standing blood pressure, 2) supine blood pressure, 3) pulse rate and regularity, 4) respiration, 5) temperature, 6) height, 7) weight (May be measured and recorded by ancillary staff) • General appearance of patient (e.g., development, nutrition, body habitus, deformities, attention to grooming)
Gastrointestinal (Abdomen) | • Examination of abdomen with notation of presence of masses or tenderness • Examination for presence or absence of hernia • Examination of liver and spleen • Obtain stool sample for occult blood test when indicated
Genitourinary | • Inspection of anus and perineum Examination (with or without specimen collection for smears and cultures) of genitalia including: • Scrotum (e.g., lesions, cysts, rashes) • Epididymides (e.g., size, symmetry, masses) • Testes (e.g., size, symmetry, masses) • Urethral meatus (e.g., size, location, lesions, discharge) • Penis (e.g., lesions, presence or absence of foreskin, foreskin retractability, plaque, masses, scarring, deformities) Digital rectal examination including: • Prostate gland (e.g., size, symmetry, nodularity, tenderness) • Seminal vesicles (e.g., symmetry, tenderness, masses, enlargement) • Sphincter tone, presence of hemorrhoids, rectal masses

Answer the following two questions. If both answers are "yes," the appropriate level of exam is comprehensive.

- Was at least one bullet documented in each unshaded box? □ Yes □ No
- Was each bullet in each shaded box documented? □ Yes □ No

Note: The Head/Face; Eyes; Ears, Nose, Mouth and Throat; Musculoskeletal; Chest (Breasts); and Extremities are not integral parts of this GU exam.
